The screenshot displays the Weka KnowledgeFlow Environment. The main workspace shows a workflow diagram with the following components: ArffLoader, ClassAssigner, CrossValidationFoldMaker, NaiveBayes, Classifier Performance Evaluator, and Text Viewer. The workflow is as follows: ArffLoader outputs a data set to ClassAssigner, which outputs a data set to CrossValidationFoldMaker. CrossValidationFoldMaker outputs a text set to NaiveBayes. NaiveBayes outputs a batch classifier to Classifier Performance Evaluator. Classifier Performance Evaluator outputs a text set to Text Viewer.

The Status Log at the bottom of the main window shows the following components and their status:
